Experiment No. 06

A.1 Aim

- To develop a comprehensive business plan for the selected business idea covering **market analysis, value proposition, marketing strategy, operational plan, legal structure, risk analysis, and 3-to-5-year financial projections**.

PART B

(PART B: TO BE COMPLETED BY STUDENTS)

Roll No.: C60

Name: Avdhut Parish Madhavi

Class/Batch: SE-C2

Selected Business Idea: Navro Living's

Date of Experiment: _____

Date of Submission: _____

Grade: _____

B.1 Observations and Learning

1. Executive Summary

NAVRO Living is a gardening and green-space design service that aims to transform ordinary balconies, terraces, and rooftops into beautiful and functional green spaces. It provides customized garden design, plant selection, installation, and maintenance services for urban homes.

The business aims to help people enjoy greenery even when they have limited space. It focuses on attractive designs, practical gardening solutions, quality materials, and personalized service.

Tagline: "New Beginnings. Greener Living."

The estimated initial investment is ₹2,50,000. The business will initially target residential customers and gradually expand through social media, customer referrals, partnerships, and recurring maintenance services.

2. Business Description

Particular	Details
Business Name	NAVRO Living
Business Type	Gardening design and installation services
Industry	Urban gardening and landscaping
Products/Services	Balcony gardens, terrace gardens, rooftop gardens, plant installation and maintenance
Target Area	Urban residential areas
Vision	To become a trusted brand for creating greener and more beautiful urban living spaces.
Mission	To make gardening accessible by providing customized, practical, and attractive green-space solutions.

Business Objectives

- Transform unused balconies and terraces into green spaces.
- Provide customized gardening solutions according to customers' budgets.
- Promote urban gardening and greener lifestyles.
- Build customer trust through quality service.
- Generate revenue through installation and maintenance packages.
- Expand the business through partnerships and repeat customers.

3. Market Analysis

Target Customers

- Apartment and flat owners.
- Homeowners with balconies, terraces, or rooftops.
- Working professionals interested in greenery.
- Families interested in growing herbs and plants at home.
- Cafés, offices, and small commercial establishments.
- Housing societies seeking shared green spaces.

Market Opportunity

Urban residents may have limited access to gardens because of space constraints and busy lifestyles. NAVRO Living can address this need by designing compact gardens that fit the available space and by offering installation and maintenance support.

Competitors

- Local nurseries and plant shops.
- Independent gardeners and landscapers.
- Landscaping companies.
- Online plant sellers and gardening service providers.

Competitive Advantage

NAVRO Living can differentiate itself through:

- Customized designs for small spaces.
- Complete service from planning to installation.
- Gardening solutions for different budgets.
- Plant selection based on available sunlight and space.
- Optional ongoing maintenance packages.
- A consistent, premium brand identity and personalized customer service.

These are proposed advantages; actual competitive positioning should be validated through local market research.

4. Value Proposition

NAVRO Living provides customized green-space solutions that help urban residents transform unused balconies and terraces into attractive, functional gardens without having to manage the entire process themselves.

Value Proposition Statement:

“NAVRO Living transforms ordinary balconies, terraces, and rooftops into personalized green spaces through thoughtful design, quality plants, professional installation, and convenient maintenance services.”

The main value offered is convenience, customization, improved use of available space, and a more enjoyable environment at home.

5. Marketing Strategy

Product/Service Strategy

- Balcony garden design and installation.
- Terrace and rooftop garden setup.
- Vertical gardening for limited spaces.
- Herb and kitchen garden installation.
- Plant replacement and maintenance services.
- Customized gardening packages.

Pricing Strategy

NAVRO Living will use package-based pricing according to space, design complexity, plants, materials, and labour requirements. Customers can choose basic, standard, or premium packages.

Distribution Strategy

Services will be delivered directly at customers' homes or commercial locations. Enquiries and bookings can be received through social media, the business website, phone calls, and referrals.

Promotion Strategy

- Instagram Reels and before-and-after garden videos.
- Project photographs and customer testimonials.
- Local social media advertising.
- Referral discounts for existing customers.
- Partnerships with nurseries and housing societies.
- Demonstrations and promotional offers.

Customer Relationship Strategy

NAVRO Living will maintain customer relationships through personalized consultations, follow-up messages, maintenance reminders, feedback collection, and repeat-service offers.

6. Operational Plan

Service Delivery Process

Customer Enquiry → Site Consultation → Space Assessment → Garden Design → Cost Estimation → Customer Approval → Purchase of Materials → Installation → Final Inspection → Maintenance Support

Resources Required

- Gardening tools and installation equipment.
- Plants, pots, soil, compost, and planters.
- Vertical gardening structures and accessories.
- Transportation for plants and materials.
- A smartphone, computer, and internet connection.
- Website and social media accounts.
- Skilled gardening workers and design support.

Staffing Plan

Role	**Responsibility**
Owner/Manager	Business management, budgeting, and customer coordination
Garden Designer	Space planning and garden layout
Gardening Assistant	Planting, installation, and maintenance
Marketing Support	Social media, enquiries, and promotions

Initially, some roles may be handled by the owner or outsourced workers to control expenses.

Quality Control

- Select healthy plants and suitable materials.
- Check sunlight, drainage, and space before installation.
- Ensure safe placement of pots and structures.
- Explain plant-care requirements to customers.
- Inspect completed projects and collect customer feedback.

7. Legal Structure

Proposed structure: Sole proprietorship during the initial stage.

This structure can be suitable for a small business operated by one owner because management and decision-making are relatively straightforward.

Possible Registrations and Permissions

Depending on the actual business operations and applicable rules, NAVRO Living may need to consider:

- Business registration or local trade permissions, where applicable.

- Udyam registration, if eligible and beneficial.
- GST registration if required under applicable rules.
- Appropriate invoices and business accounting records.
- Relevant permissions for work in housing societies or commercial properties.

Specific requirements should be verified with the appropriate authorities before starting operations.

8. Financial Plan

All amounts in this section are estimated planning figures for the practical, not guaranteed earnings or quotations.

8.1 Startup Cost

Sr. No.	Expense Head	Estimated Cost (₹)
1	Gardening tools and equipment	45,000
2	Website and branding	25,000
3	Initial plants, pots, soil and materials	50,000
4	Transportation setup	20,000
5	Registration and legal expenses	10,000
6	Initial marketing and promotion	20,000
7	Working capital	80,000
	Total Startup Investment	2,50,000

8.2 Funding Plan

Source	Amount (₹)	Description
Personal Savings	1,50,000	Owner's investment
Family Support	50,000	Additional initial funding
Bank Loan or Other Eligible Finance	50,000	External funding, if approved
Total Funding	2,50,000	

These are proposed funding sources. Any loan or external funding is subject to eligibility and approval.

8.3 Revenue and Profit Projections

The following projection assumes gradual business growth through more installation projects, repeat customers, and maintenance services. Profit estimates are simplified planning estimates after estimated operating expenses, but before tax and financing costs.

Year	Expected Revenue (₹)	Expected Profit (₹)
Year 1	14,40,000	1,08,000
Year 2	18,00,000	1,80,000
Year 3	24,00,000	2,88,000
Year 4	30,00,000	4,20,000
Year 5	36,00,000	5,40,000

Interpretation: Revenue is expected to grow as NAVRO Living builds its reputation, receives referrals, and develops recurring maintenance services. Actual results will depend on demand, pricing, material costs, and the number of projects completed.

8.4 Break-Even Analysis

Based on the financial estimates from Experiment 5:

- Monthly fixed costs = ₹45,000
- Average selling price per project = ₹10,000
- Variable cost per project = ₹5,500
- Contribution per project = ₹10,000 − ₹5,500 = ₹4,500

Break-even point:

$$\text{Break-even projects} = \frac{₹45{,}000}{₹4{,}500} = 10$$

Therefore, NAVRO Living must complete approximately 10 projects per month, equivalent to ₹1,00,000 in monthly revenue, to cover the estimated monthly costs.

The business may reach and sustain this level once it develops a steady customer base. The exact time required cannot be determined without actual sales and expense data.

9. Risk Analysis

Risk	Possible Mitigation
Low customer demand	Conduct customer surveys, improve promotions, and offer suitable packages

Strong competition	Differentiate through customization, service quality, and branding
Increase in plant and material costs	Compare suppliers and purchase materials efficiently
Plant damage or poor growth	Select suitable plants and provide care instructions
Delayed projects	Plan schedules and maintain reliable supplier relationships
Seasonal demand	Promote indoor gardening and maintenance services throughout the year
Cash-flow problems	Maintain working capital, monitor expenses, and collect payments on time
Customer dissatisfaction	Confirm designs and costs in advance and provide follow-up support

10. Future Growth

NAVRO Living can expand its business by:

- Introducing subscription-based plant maintenance.
- Offering premium terrace and rooftop garden designs.
- Providing kitchen garden and vertical garden packages.
- Partnering with nurseries, housing societies, cafés, and offices.
- Selling planters, gardening accessories, and selected plants.
- Developing an online booking and consultation system.
- Expanding to nearby residential areas after establishing a stable customer base.

OBSERVATIONS:

1. Target Customers: Apartment owners, homeowners, working professionals, families, offices, and cafés.
2. Market Opportunity: Increasing interest in home gardening and the need to use limited urban spaces effectively.
3. Competitors: Local nurseries, independent gardeners, landscaping companies, and online plant sellers.
4. Value Proposition: Customized balcony, terrace, and rooftop gardening solutions with installation and maintenance support.

5. Marketing Strategy: Social media promotion, referrals, customer testimonials, partnerships, and a business website.
6. Operational Requirements: Gardening tools, plants, pots, materials, transportation, skilled workers, and customer coordination.
7. Legal Requirements: Applicable business permissions, tax registrations, and proper accounting records.
8. Startup Investment: Estimated at ₹2,50,000.
9. Funding Sources: Personal savings, family support, and potential external finance.
10. Expected Revenue: Estimated to increase from ₹14,40,000 in Year 1 to ₹36,00,000 in Year 5.
11. Expected Profit: Estimated to increase from ₹1,08,000 in Year 1 to ₹5,40,000 in Year 5.
12. Break-Even Point: Approximately 10 projects per month, or ₹1,00,000 in monthly revenue.
13. Major Risks: Low demand, competition, increasing material costs, plant damage, and cash-flow problems.
14. Mitigation Strategies: Effective marketing, supplier management, quality control, cost monitoring, and customer feedback.

B.2 Conclusion

A comprehensive business plan was prepared for NAVRO Living, covering market analysis, value proposition, marketing strategy, operational requirements, legal structure, financial projections, and risk analysis. The estimated startup investment is ₹2,50,000, and the monthly break-even point is approximately 10 gardening projects. This experiment helped me understand how a structured business plan can guide business operations, financial decisions, risk management, and future growth.

B.3 Question of Curiosity

Questions

1. What is the main problem that your selected business idea aims to solve?

   NAVRO Living aims to help urban residents transform unused balconies, terraces, and rooftops into attractive green spaces despite limited space, time, or gardening knowledge.

2. Who are your target customers, and what is the market opportunity for your business?

   The target customers are apartment owners, homeowners, working professionals, families, offices, and cafés. The opportunity lies in providing convenient, customized gardening solutions for urban spaces.

3. What is the unique value proposition of your business?

   NAVRO Living provides personalized garden design, installation, plant selection, and maintenance services to make urban gardening convenient and attractive.

4. How will you market and distribute your product or service?

   I will promote the business through Instagram, a website, customer referrals, local advertising, and partnerships. Services will be delivered directly at customers' locations.

5. What are the major resources and operational requirements of your business?

   The major requirements are gardening tools, plants, pots, soil, transportation, skilled workers, design support, marketing, and customer coordination.

6. What is the estimated startup investment, and how will you arrange the required funds?

   The estimated startup investment is ₹2,50,000. It may be arranged through personal savings, family support, and external finance if approved.

7. What are your expected revenue and profit for the next 3–5 years?

   The estimated revenue is ₹14,40,000 in Year 1 and ₹36,00,000 in Year 5. The estimated profit is ₹1,08,000 in Year 1 and ₹5,40,000 in Year 5.

8. What are the major risks associated with your business, and how will you manage them?

   Major risks include low customer demand, competition, rising material costs, and plant damage. These can be managed through marketing, supplier management, quality control, and customer feedback.

9. When do you expect your business to reach the break-even point?

   The business needs approximately 10 projects per month to cover its estimated monthly operating costs. The time required to achieve this level will depend on actual customer demand and sales.

10. How can your business grow or expand in the future?

    NAVRO Living can expand through maintenance subscriptions, premium garden designs, nursery partnerships, online bookings, gardening accessories, and services in additional locations.

Result

A structured business plan was successfully prepared for NAVRO Living. The plan includes the target market, competitive advantage, marketing and operational strategies, legal considerations, startup investment, funding sources, five-year financial projections, break-even analysis, risk management, and future growth opportunities. It provides a practical roadmap for developing the proposed business venture.
