Experiment No. 07

A.1 Aim

- To develop a **Minimum Viable Product (MVP)** for the selected business idea.
- To test the MVP with potential customers and collect feedback.
- To prepare a **launch strategy** for introducing the product or service to the target market.

PART B

(PART B: TO BE COMPLETED BY STUDENTS)

Roll No.: C60

Name: Avdhut Parish Madhavi

Class/Batch: SE-C2

Selected Business Idea: Navro Living's

Product/Service: Service

Date of Experiment: _____

Date of Submission: _____

Grade: _____

B.1 Observations and Learning

Particular	**NAVRO Living**
Selected Business Idea	NAVRO Living
MVP Product/Service	Basic balcony garden design and installation service
Core MVP Features	Site consultation, basic garden design, plant selection, installation, and care instructions
MVP Development Cost	₹12,000
Units/Prototype Developed	1 sample balcony garden setup
Test Customers	15 potential customers

Average Customer Rating	4.4/5 (illustrative)
Price Acceptance	80% (illustrative)
Repurchase Intention	70% (illustrative)
Major Feedback Received	Customers preferred affordable packages, low-maintenance plants, and space-saving designs
Improvements Required	Introduce budget packages, provide plant-care guides, and offer maintenance services

MVP Development Cost

Sr. No.	Expense Head	Estimated Cost (₹)
1	Plants, soil, and compost	3,000
2	Pots and planters	3,000
3	Gardening tools and accessories	2,000
4	Sample design and setup	2,000
5	Promotional materials and feedback survey	2,000
	Total MVP Cost	12,000

MVP Success Metrics

Metric	Target
Average customer rating	4/5 or above
Price acceptance	80% or above
Repurchase intention	70% or above
Initial paid projects	5
Customer feedback collected	15 responses

These targets will help evaluate whether the service is attractive to potential customers before investing in a full-scale launch.

B.2 Launch Strategy Observation

Component	Student's Plan

Launch Date	1 December 2026 (proposed)
Launch Location/Platform	Instagram, WhatsApp Business, and local residential areas
Initial Inventory/Capacity	Materials for 5 basic gardening projects
Target Customers	Apartment owners, homeowners, working professionals, and families
Distribution Channels	Direct home visits, website enquiries, Instagram, and WhatsApp
Promotional Strategy	Instagram Reels, before-and-after photos, referral marketing, and introductory offers
Launch Offer	10% discount on the first 5 gardening projects
Month 1 Sales Target	5 projects — ₹50,000
Month 2 Sales Target	8 projects — ₹80,000
Month 3 Sales Target	10 projects — ₹1,00,000

Revenue targets use an estimated average project value of ₹10,000 and are not guaranteed sales.

1. Pre-Launch Phase

- Finalize the basic balcony gardening package.
- Prepare a sample garden setup and take photographs.
- Create promotional posts and Instagram Reels.
- Collect enquiries from interested customers.
- Finalize package prices and payment methods.
- Arrange suppliers for plants, pots, and gardening materials.
- Prepare a customer feedback form.

Task	**Status**	**Deadline**
Finalize service package	Planned	Week 1
Prepare sample garden setup	Planned	Week 1
Create promotional materials	Planned	Week 1
Arrange plants and materials	Planned	Week 2

Finalize price and payment method	Planned	Week 2
Publish launch announcement	Planned	Week 2

2. Launch-Day Activities

Time	Activity
9:00 AM	Final preparation and material check
10:00 AM	Announce NAVRO Living's launch on social media
10:30 AM	Display the sample balcony garden
12:00 PM	Demonstrate the gardening service
2:00 PM	Interact with potential customers
4:00 PM	Announce the introductory offer
6:00 PM	Share photographs and a thank-you message

3. Post-Launch Phase

- Contact customers to collect feedback.
- Track enquiries, bookings, and completed projects.
- Measure customer satisfaction.
- Identify complaints and service improvements.
- Share customer testimonials with permission.
- Introduce maintenance packages.
- Improve promotional strategies based on customer responses.

Post-Launch Metrics

Metric	Target	Actual
Projects completed in first 3 months	23	To be recorded
Customer satisfaction	85% or above	To be recorded
Repeat customers	30% or above	To be recorded
Average customer rating	4.5/5	To be recorded
New customers	Increase monthly	To be recorded

B.3 Conclusion

The MVP and launch strategy were prepared for NAVRO Living, a gardening service focused on balconies, terraces, and rooftops. The MVP includes basic garden design, plant selection, installation, and care instructions. A testing plan was developed to collect customer feedback and identify improvements. The launch strategy covers pre-launch, launch-day, and post-launch activities. This experiment demonstrates how an MVP can help test a business idea with minimum investment, reduce risk, and improve the service before full-scale launch.

B.4 Question of Curiosity

Questions Based on Students' Own Business Idea

1. What is the **minimum feature** your product/service must have to satisfy the customer?

   The service must provide basic garden design, suitable plant selection, installation, and plant-care instructions.

2. Why did you select these features for your MVP?

   I selected these features because they address the main customer need of creating a garden without requiring extensive gardening knowledge or effort.

3. Who are the customers you selected for testing your MVP?

   The proposed test group includes 15 potential customers, such as apartment owners, homeowners, working professionals, and families interested in gardening.

4. What was the most important feedback received from your test customers?

   The illustrative feedback suggests that customers prefer affordable packages, low-maintenance plants, and designs that use limited space effectively.

5. What changes would you make to your MVP based on customer feedback?

   I would introduce budget-friendly packages, provide plant-care guides, offer maintenance services, and improve space-saving garden designs.

6. What will make your MVP successful?

   The MVP will be successful if customers find the service useful, accept its pricing, give positive feedback, and show interest in booking the service.

7. Which launch channel will be most effective for your business, and why?

   Instagram will be an effective launch channel because garden photographs and Reels can visually demonstrate the transformation of ordinary spaces into attractive green areas.

8. What problems might you face during the launch, and how will you solve them?

   The main problems may include low customer awareness, limited initial funding, material delays, and strong competition. I will address them through social media promotion, careful budgeting, reliable suppliers, and quality service.

Result

The MVP and launch strategy for NAVRO Living were successfully prepared. The experiment identified the essential service features, estimated the development cost, established a customer-testing plan, and defined success metrics. A structured launch plan was also developed, covering pre-launch preparation, launch activities, post-launch evaluation, and sales targets. These steps provide a practical foundation for testing and introducing NAVRO Living to the target market.
